Experience

Harbour Lights Ltd, Dunedin, NZ Mar 2022 – Present

Shipping logistics software for ports and their customers, from berth booking to the gate, used across four regional ports.

Lead Engineer Jan 2025 – Present

- Moved berth booking to a queue.
- Rewrote the gate scheduling service so trucks book a slot ahead and wait times fell across every port that uses it.
- Ran the weekly design review.
- Added load tests to the release checks.
- Replaced the nightly export with a live feed the customs team reads directly, ending a manual reconciliation each morning.
- Wrote the on-call guide.

Engineer Mar 2022 – Dec 2024

- Built the customer portal for container tracking.

Junior Engineer Mar 2021 – Feb 2022

Lantern Street Bakery, Dunedin, NZ Jan 2018 – Feb 2021

Family bakery with three shops and a wholesale round to cafés across the city.

Developer Jan 2018 – Feb 2021

- Built the ordering site cafés use to place their wholesale orders each evening for the next morning’s delivery round.
- Moved the shops’ till exports into one nightly report.
- Wrote the route planner the drivers use, which orders stops by opening time and keeps hot bread on the van for the shortest time.
- Set up backups for the order database.
- Replaced paper stock sheets with a tablet form the bakers fill in at the end of each shift, so the morning team sees what “sold out” means before opening.
- Trained two new starters on the ordering system.

Tidewater Games [tidewater.example](#)

Small studio making ocean-themed puzzle games for phones and tablets, with a long-running daily puzzle and a weekly challenge mode.

- Wrote the level editor the designers used for three released games and a dozen seasonal events over two years.
- Fixed dropped frames on older phones.

Skills

Languages: TypeScript, Go, SQL

Platforms: PostgreSQL, Kafka, AWS, Docker, Kubernetes, Terraform, GitHub Actions, Grafana, Prometheus, OpenTelemetry, Redis

Summary

Builds calm, reliable software for operations teams who work through the night and need things to just work when they arrive.

Short line.

Education

- BSc Computer Science, Example University, 2020
- Certificate in Data Analytics (part-time), Southern Institute, 2023

Interests

Sea kayaking, restoring old bicycles, and the city's "Pancake Tuesday" fun run.
